

Carry out return delivery

Process chart

Carrying out a return delivery works similarly to carrying out a delivery. The main difference is that you can record intact and damaged material separately.

Optional steps are shown with dashed outlines in the chart.

Carry out return delivery

Process steps

1. Open storage task

Open Tasks in the mobile app and tap the Storage task.

2. Start storage

Open the action menu at the bottom right and tap Start Task. The linked return delivery opens automatically and moves to In Progress status.

3. Select part

Tap the part whose returned quantity you want to record in the material list.

4. Enter quantities

Enter the returned quantity separately:

5. Add additional material (optional)

If material returns that is not on the planned list, open the action menu and tap Add Part. Select the part and enter its Intact and, if applicable, Scrap quantities.

6. Complete storage

Review the recorded quantities and correct them if necessary. Then return to the Storage task, open the action menu, and select Complete Task:
